PROFILE

Systems Engineering student at UPB with an IBM professional certificate in full stack development. I have built a production website for a real client and an 11-microservice system in .NET 8. I am interested in backend and security, and I am looking for my first job or internship as a developer.

EXPERIENCE

Web developer · Client project
Nadia FX, Caracterización (Madrid, Spain)

- Designed and built the full website: portfolio, services and contact.
- Built the appointment booking flow that sends the request through WhatsApp.
- Developed a private panel for the client to manage her weekly availability.
- TypeScript monorepo with Astro, Hono and Zod; tests with Vitest and architecture checks.

PROJECTS

Veterinary & Pet Store Ecosystem
C# · .NET 8 · Kafka · PostgreSQL · MongoDB · Redis · Docker
11 microservices with Clean Architecture, DDD and event-driven architecture; one database per service and GoF patterns (Strategy, State, Memento, Factory).

Django web app with assessments
Python · Django · SQLite
IBM final project: online course platform extended with an assessment module and its relational model.

IBM certificate projects
Node.js · Express · React · Flask · MongoDB
Book review REST API with Express, a React store and backend services with Flask and MongoDB.

EDUCATION

Systems Engineering In progress
Universidad Pontificia Bolivariana, Medellín

CERTIFICATIONS

IBM Full Stack Software Developer
IBM · Coursera

SKILLS

Backend	C# / .NET 8, Python, Django, Flask, Node.js, Express, Hono
Frontend	HTML, CSS, JavaScript, TypeScript, React, Astro
Data	PostgreSQL, MongoDB, SQLite, Redis, Kafka
Tools	Git, GitHub, Docker, pnpm, Vitest
Linux	Daily Arch Linux user (Hyprland, fish), Bash, terminal and system administration

INTERESTS

Cybersecurity and pentesting, computer hardware and electronics.
